

# Water Bill Changes

Effective May 1, 2010, the City of Reedley's water charge will be based upon a new rate structure. There are two components that determine what your new water fee will be. The first amount is a monthly fee that is based upon the size of your water meter. Most homes have either a ¾" or a 1" sized meter. The second part of your monthly water charge will be based upon how much water you have used inside and outside of your home each month. Your first consumption charge will appear on your June 2010 bill.

WATER METER SIZE	MONTHLY CHARGE
